Axial-Pulsator

Coolant pressure gauging-kit

Drill Head Setting Gauge

<p>Axial-Pulsator The botek Axial-Pulsator has been developed to maximize the feed rate of straight fluted deep hole drilling tools when drilling steel and long chipping materials.</p> <p>botek's Axial-Pulsator achieves equal hole making quality (straightness, run out, concentricity and surface finish) as standard deep hole drilling tools with economic performance.</p> 	<p>Coolant pressure gauging-kit Coolant pressure gauging-kit for machining centres on deep hole drilling machines.</p> 	<p>Drill Head Setting Gauge Process reliable diameter setting of drill heads.</p>

Service

Customer testing in our research and development department:

- tool development specifically tailored to suit your application
- supportive when introducing the latest technology
- solving processing problems

Process layout: You submit us your drilling application and we will develop the whole process from engineering to finding the perfect tooling solution.

Process optimization: Our team of Application Engineers analyse and improve your process in your facility and coordinate all technical details.

Reduced manufacturing costs by:

- optimised cutting values
- improved tool life
- shortened auxiliary process time
- maximized process capacity is our goal.

The botek trial department assists you in all stages of the process with:

- Feasibility tests
- Optimization
- Instruction and training for your technicians

Regrinding:

botek offers prompt and cost effective in house regrinding service.

Coating:

botek offers prompt and cost effective in house coating service.

- Please see our application notes
- Our General Standard Terms and Conditions, which we assume as known, apply.
- We reserve the right to make modifications in the interests of technical improvement. Such modifications cannot, in principle, be accepted as justifiable grounds for complaint.
- Subject to change. The manufacturer accepts no responsibility for misprints and other errors.
